WAR DEPARTMENT,
OFFICE OF THE CHIEF OF STAFF,
DIVISION OF MILITIA AFFAIRS,
Washington, D. C., August 27, 1914.

The following tables of organization prescribe the peace organization of the Organized Militia of the United States. The war organization of the Organized Militia is prescribed in Section II, Tables of Organization, United States Army, 1914, with the addition of inspectors of small-arms practice authorized for peace. All orders at variance with the organization herein given are revoked. All matters in conflict with these tables that are contained in Regulations of the War Department for the Organized Militia, and in circulars of the Division of Militia Affairs are hereby modified to meet the conditions prescribed.

The war strength tables are necessarily based on the maximum war strength authorized by existing law. The peace organization herein outlined permit in every instance ready expansion to war strength.

The tables prescribe a minimum strength of organizations. Where desired, States are authorized to organize, recruit, and equip up to the war strength prescribed in Section II, Tables of Organization, United States Army, 1914.

The number of rifles and pistols shown is only approximate, and in no sense is to be considered as prescribing the equipment. The various equipment manuals definitely fix the number of rifles and pistols to be supplied.

The allowance of transportation for combat trains depends upon the quantity and character of ammunition and special equipment actually required to be with organizations in battle and on the march. (See Field Service Regulations.) This allowance varies with the different branches and arms.

The transportation allowance for field trains is based on the principle that rations, grain, and other supplies carried in those trains are to be replenished at the same intervals for each branch and arm of the service; the size of the train depending entirely upon the strength of the organizations and the number of animals attached.

The transportation allowances for baggage are prescribed in Tables of Organization, United States Army, 1914.

Whenever the conditions of the service make it necessary to detach for independent action, companies, troops, batteries, squadrons, or battalions, they may have assigned to them a portion of the regimental field train, or if the dispersion of the division is general, the vehicles and animals of the supply and ammunition trains are available for this purpose.

In commands smaller than divisions in time of peace the wagons of the combat train may, when so authorized, be used in carrying such additional baggage for the officers and enlisted men of the organization as is deemed necessary by the commander, or may be assigned to companies, troops, batteries, etc., when these are detached and marching independently from their regiments.

Vehicles and pack animals assigned to the combat trains will habitually march with the organization to which assigned in the manner prescribed in Field Service Regulations. They will be kept at all times completely supplied with their special equipment, except that the ammunition, if any, to be carried in time of peace will be specified in orders.

The wagons assigned to the combat trains and to the ration and baggage section of field trains of organizations will, at all times, have stenciled on both sides of the wagon bed, in black, the following words in 6-inch letters, viz:

"Combat train, ——— Inf. (Abbreviation of State)."
"Field Train, Ration, ——— Inf. (Abbreviation of State)."
"Field Train, Baggage, ——— Inf. (Abbreviation of State)."

The ambulances and wagons temporarily assigned to each regiment of Infantry, Cavalry, and Artillery in time of peace for the purpose of transporting the sick and the camp infirmary will be assigned by the State authorities to ambulance companies and field hospitals of the division sanitary trains when possible, and will be marked with the words "Sanitary Train ——— Division," and the number of the company to which assigned. While temporarily assigned to regiments, ambulances march with the combat train, and the wagons carrying the camp infirmary march with the baggage section of the field train. As the weight of the camp infirmary alone will leave an excess of carrying capacity in this wagon, and as the Field Service Regulations require the baggage of the regimental sanitary detachment to be carried on the baggage section of the field train, the remaining space on this wagon may be utilized in such manner as is deemed best by the regimental commander.

The excess wagons in States which are suitable for field service will be assigned by the State authorities to the divisional ammunition, supply, and sanitary trains and will be marked accordingly.

BY ORDER OF THE SECRETARY OF WAR:

W. W. WOTHERSPOON,
Major General, Chief of Staff.

OFFICIAL:
A. L. MILLS,
Brigadier General, General Staff,
Chief, Division of Militia Affairs.

[1] In addition to the adjutant general, a brigadier general.
[2] In addition to those attached to combatant and belonging to sanitary units.
[3] Only in States having engineer troops.
[4] In addition to division and brigade inspectors of small-arms practice.

NOTE.—The above table, except where otherwise noted, includes officers of division and separate brigade headquarters.

Table 2.—Composition of Divisions and Brigades.

An Infantry division consists of—
- Division headquarters.
- 3 brigades of Infantry.
- 1 regiment of Cavalry.
- 1 brigade of Artillery.
- 1 pioneer battalion Engineer troops.
- 1 field battalion Signal troops.
- Trains:
  - 1 ammunition train.
  - 1 supply train.
  - 1 sanitary train.

An Infantry brigade consists of—
- Brigade headquarters.
- 3 regiments of Infantry.

An Artillery brigade consists of—
- Brigade headquarters.
- 2 regiments of Field Artillery.

[h] Individually mounted on a horse; 1 led horse for each field officer.
[m] Individually mounted on a mule.
[1] Assistant inspector of small-arm practice (optional).

Headquarters company:
[2] Also performs duties of regimental adjutant.
[3] Also performs duties of battalion adjutants.
[4] One is a detailed private and acting cook.
[5] Two mounted orderlies and one private not mounted, for duty at brigade headquarters.

Machine-gun company:
[6] Regimental commissary.
[7] A battalion quartermaster and commissary.
[8] One acting first sergeant (mounted); one acting quartermaster sergeant who shall be mess sergeant; one range finder (mounted); one chief cargador and stable sergeant; two sergeants with each platoon of 2 guns.
[9] Two as agents of communication (mounted); two with each platoon of 2 guns.
[10] Two as acting cooks; one as acting artificer; one as driver of combat wagon; 16 with each platoon of 2 guns.

Supply company:
[11] Regimental quartermaster.
[12] Battalion quartermasters and commissaries.
[13] (Detailed); one as a supply sergeant (mounted); one as acting first sergeant and wagon master (mounted); one as acting quartermaster and mess sergeant.
[14] (Detailed); as assistant wagon masters (mounted).
[15] (Detailed); one as cook; one as saddler; two as horseshoers; one as blacksmith; 21 as drivers.
[16] Privates, first class; and privates.

[17] The headquarters of a separate battalion, not a part of a regiment, will consist of 1 major, 1 first lieutenant and battalion adjutant, 1 first lieutenant and assistant inspector of small-arms practice (optional), 1 second lieutenant and battalion quartermaster and commissary, and 1 battalion sergeant major. The field train of a separate battalion will consist of 4 wagons and 16 draft mules. The combat train will be as shown in the table. A separate battalion may have a headquarters detachment (optional) of 1 sergeant, acting battalion quartermaster sergeant; 3 privates, mounted orderlies; 7 privates drivers, detailed from companies of the battalion.

[18] From headquarters company—1 battalion adjutant, 1 battalion sergeant major, and 2 mounted orderlies; not counted in battalion "total."

REMARKS—"(Detailed)" indicates that the individuals concerned are borne on the rolls of companies of battalions, the strength of these companies being increased by the number necessary, and the enlisted men being permanently detailed for the duty indicated. These men are carried on the rolls of companies not necessarily having the same station as the detailed (provisional) company. The detailed men are not counted in computing the prescribed minimum strength. They are counted in computing the statutory maximum strength, which strength must not be exceeded in any grade. The statutory strength of a company of infantry is 6 sergeants, 10 corporals, and 127 privates. Noncommissioned officers and privates who are detailed with the provisional companies will be taken from these extra noncommissioned officers and privates authorized. Where companies are recruited to a greater strength than the minimum prescribed in the above table the number of noncommissioned officers will not exceed the following:

5 sergeants to 87 privates. 7 corporals to 68 privates. 9 corporals to 107 privates.
6 sergeants to 127 privates. 8 corporals to 87 privates. 9 or 10 corporals to 127 privates (9 in eight companies and 10 in four companies).

The organization of the detailed portion of the headquarters and supply companies, and the organization of a machine-gun company will be optional with each State. States desiring to organize the detailed portion of the headquarters and supply companies, or the machine-gun company, will make application to the Secretary of War for the necessary authority, which will not be granted unless the organization of the other units is complete.

In cases where the machine-gun company has already been organized as a separate organization, such organization may continue during the continuance of commission of the officers thereof. When these officers are promoted, or vacancies exist, the vacancies will be filled by detailed officers as indicated in the table. As enlistments of men expire they will be filled by men enlisted in companies of battalions and detailed to the machine-gun company.

When the detailed portions of these provisional companies are not organized the regimental commissary and the battalion quartermaster and commissary regularly detailed as officers of the machine-gun company, will be attached to the supply company as additional officers.

Until these provisional organizations are organized the field, staff, and noncommissioned staff of a regiment will be as follows: 1 colonel, 1 lieutenant colonel; 3 majors; 1 captain and adjutant; 1 captain and quartermaster; 1 captain and commissary; 1 captain and assistant inspector of small-arms practice (optional); 1 chaplain; 3 first lieutenants and battalion adjutants; 3 second lieutenants and battalion quartermasters and commissaries; 1 regimental sergeant major; 1 regimental quartermaster sergeant; 1 regimental commissary sergeant; 2 color sergeants; 3 battalion sergeants major. The band of 28 men will be organized as shown in the table under band section, omitting the private detailed as acting cook.

Summary of enlisted men detailed from companies of battalions to provide for the personnel of the headquarters, machine-gun, and supply companies:

	Sergeants.	Corporals.	Privates.
Headquarters company	1	.....	20
Machine-gun company	8	6	36
Supply company	3	2	26
Total	12	8	82

[1] Assistant inspector small-arms practice.
[2] Regimental quartermaster and 2 squadron adjutants.
[3] 1 sergeant as supply sergeant; 12 wagoners as drivers; 16 privates (10 as drivers and 1 as farrier, 1 as saddler, 1 as horseshoer, and 3 as orderlies at regimental headquarters).
[4] These detailed men are carried on the rolls of troops not necessarily having the same station as the detailed detachment. The detailed men are not counted in computing authorized minimum strength. They are counted in computing statutory maximum strength, which strength must not be exceeded in any grade.
[5] The regimental commissary; 1 squadron adjutant; 8 sergeants (1 acting first sergeant; 1 acting troop quartermaster sergeant; 1 armorer; 1 range finder, 4 chiefs of section); 6 corporals (2 signalmen and scouts; 4 gun pointers); 51 privates (12 gunmen, 4 of whom act as ammunition carriers; 4 ammunition and intrenching-tool carriers; 8 signalmen and scouts; 8 ammunition carriers; 13 drivers; 6 horse holders, 2 of whom are acting cooks).
[6] 2 orderlies, 1 wagoner.
[7] This assumes the following: That each squadron details 2 corporals, 4 wagoners, and 2 privates (latter for duty in regimental service detachment as farriers, horseshoers, saddlers and orderlies) to the 2 provisional troops; that 2 squadrons detail 3 sergeants each to the machine-gun troop, the other squadron detailing 2 sergeants to the machine-gun troop and 1 sergeant to the regimental service detachment; that 2 squadrons detail 3 drivers each and the remaining squadron 4 drivers to the regimental service detachment; and that each squadron detail 17 privates to the machine-gun troop. This distribution of detailed men is not mandatory. Machine-gun men have no rifles. The detailed wagoners and drivers are dismounted men.
[8] Minimum.

Table 8.—Artillery Brigade.[1]

Organization.	Personnel of brigade.																Carriages.					Animals.				Small arms, pistols (or revolvers).
	Commissioned.									Veterinarians.	Enlisted.				Civilians.		With firing batteries.		Combat train carriages.	Field trains.		Mounts, horses, riding.	Horses, draft.	Mules.

[1] Note.—The type of guns and matériel for service with Artillery brigades attached to Infantry divisions may be either of the following:
(*a*) Three battalions equipped with 3-inch field guns; 1 battalion equipped with 3.8-inch field howitzers.
(*b*) Three battalions equipped with 3-inch field guns; 1 battalion equipped with 4.7-inch field howitzers (8-horse teams).
In the case of (*a*) the organization, personnel, and number of carriages and animals is the same as that of a light Artillery regiment.
In the case of (*b*) one battalion of light Artillery is replaced by one battalion of heavy Field Artillery equipped with 4.7-inch field howitzers (organized like a battalion 4.7-inch guns or 6-inch howitzers).
[2] It is assumed that brigade adjutant is detailed from a regiment of the brigade (or is an officer of the Adjutant General's Department); and that personal aids are detailed from the division
[3] Privates, mounted, detailed from regiments of brigade. One led horse for each officer above the grade of captain.

[A] Two or more battalions may, for purposes of administration, drill, and instruction, be organized as a regiment as prescribed for infantry, omitting headquarters, machine gun, and supply companies.

[b] Individually mounted on horses. 1 led horse for major (optional).

[m] Individually mounted on mule, or on horse if mule not available.

[1] Where engineer troops of a State are organized as a corps, the company and battalion officers shall belong to the corps and be assigned for duty with the organization.

[2] Owned or hired; for service in the field, and when required for drills, horses and mules may be used interchangeably if prescribed number of either not available.

[3] Two sergeants detailed as color sergeants.

[4] The total number of privates is 126, first and second class; the number of first-class privates may equal, but should not exceed the number of second-class privates.

[5] Battalion adjutant.

[6] Assistant inspector of small-arms practice; one for each separate battalion or for two or more battalions where united for purposes of administration, drill, and instruction.

[7] One map wagon (4-mule). One tool and explosive wagon (4-mule).

[8] When authorized by the Secretary of War, same as prescribed for infantry.

[9] Battalion quartermaster and commissary.

[10] Two first lieutenants for companies having strength of 68 or more enlisted.

[11] First or second class.

[12] Three detailed as horseshoers, 3 as farriers, 3 as saddlers, 9 as drivers, and 3 as mounted orderlies at battalion headquarters.

[13] Companies having enlisted strength of 100 or more will have mounted section as prescribed for pioneer company of the Regular Army.

[14] Tool and explosive, etc. (4-mule).

[15] Sanitary combat train.

[1] Detailed from infantry and field artillery of division.
[2] Detailed from infantry of division.
[3] Detailed from field artillery of division.
[4] Autotruck companies will carry the ammunition reserve of an infantry division.

REMARKS.—The number of vehicles in the ammunition train is dependent on the number of rifles, machine guns, pistols, and field artillery guns actually with the division for which the reserve prescribed in Section I, Table II, A and B, must be carried. The size of this train may be decreased or increased to meet these conditions. In peace maneuvers, when no reserve ammunition is actually carried, the ammunition train will simply be represented in skeleton.

TABLE 20.—SUPPLY TRAIN.

[1] The lieutenant colonel and sergeant major, senior grade authorized for corps of 8, 9, 10, and 11 companies are exceptions and are authorized in time of peace only. Likewise, one of the lieutenant colonels and sergeants major, senior grade, authorized for corps of 20, 21, 22, and 23 companies and corps of 32, 33, 34, and 35 companies, are exceptions and are authorized in time of peace only.

[2] In time of peace one band is authorized for each coast defense command consisting of four or more companies of Coast Artillery. In time of war bands will be accepted in the service of the United States at the rate of one band for each twelve companies of Coast Artillery.

COAST DEFENSE COMMANDS.

The officers, noncommissioned staff officers, companies, and bands comprising each Coast Artillery Corps of the Organized Militia may be organized into two or more coast defense commands, and the officers, noncommissioned officers, companies, and bands constituting the Coast Artillery Corps may be assigned to these coast defense commands at the discretion of the governors of the States, the Territory of Hawaii, or the commanding general, District of Columbia Militia.

The assignment of Coast Artillery troops of the Organized Militia to coast defenses and to batteries thereat will be made by the War Department.

COMPANIES.

Companies of Coast Artillery of the Organized Militia will be organized as stated in the following table:

When the total enlisted strength of company is from—	Captains.	First lieutenants.	Second lieutenants.	First sergeants.	Quartermaster sergeants.	Sergeants.	Corporals.	Cooks.	Mechanics.	Musicians.	Privates.	Total enlisted.
65 to 70, inclusive	1	1	1	1	1	4	6	2	2	2	47–52	65–70
71 to 80, inclusive	1	1	1	1	1	5	7	2	2	2	53–62	71–80
81 to 90, inclusive	1	1	1	1	1	6	8	2	2	2	63–72	81–90
91 to 100, inclusive	1	1	1	1	1	7	10	2	2	2	73–82	91–100
101 to 109, inclusive	1	1	1	1	1	8	12½	2	2	2	83–91	101–109

NOTE.—Minimum authorized peace strength of a company of Coast Artillery of the Organized Militia is 65 enlisted men, as shown in the first line of the foregoing table. The maximum war strength of a company of Coast Artillery of the Organized Militia is 109 men, as shown in the last line of the foregoing table.

RATED ENLISTED MEN.

For each gun company: One plotter; one observer, first class; one observer, second class; two gun commanders; and two gun pointers.

For each mortar company: One plotter; one observer, first class; two observers, second class; and three gun commanders. One gun commander may be placed in charge of the magazines.

TABLE 25.—COAST ARTILLERY—Continued.

BANDS.

Each Coast Artillery band shall consist of:
- 1 chief musician.
- 1 chief trumpeter.
- 1 principal musician.
- 1 drum major.
- 4 sergeants.
- 8 corporals.
- 1 cook.
- 11 privates.
